

Pipeline Rehabilitation J-2 (Laterals)

Infrastructure Projects:

- Airports
- Bikeways
- Bridges
- Drainage Control Facilities
- Flood Control Facilities
- Libraries
- Parks
- Recreation Centers
- Police Stations
- Fire Stations
- Lifeguard Stations
- Street Improvements
- Street Lights
- Traffic Signals
- Utilities Undergrounding
- Water Facilities
- Sewer Facilities
- Water Pipelines
- Sewer Pipelines

Background

Pipeline Rehabilitation J-2 (Laterals) is part of a program established by the City of San Diego and the Environmental Protection Agency mandating the rehabilitation of old and deteriorated sewer mains. The rehabilitation of existing sewer mains will improve the sewage collection systems within the area of the project

Project Overview

Pipeline Rehabilitation J-2 (Laterals) is located within Council Districts 1, 2, 4, 5, 6, 7, 8, and 9. It is within the communities of Rancho Bernardo, Mira Mesa, Scripps/Miramar Ranch, La Jolla, Pacific Beach, University, Clairemont Mesa, Midway-Pacific Hwy, Peninsula, Linda Vista, Uptown, Serra Mesa, Balboa Park, Greater North Park, Southeastern San Diego, Southeastern, Navajo, College Area, Encanto Neighborhoods, Otay Mesa-Nestor, and San Ysidro. The project includes the rehabilitation of approximately 3,209 existing 4", 6" and 8" sewer laterals within the City's right of way utilizing **trenchless technology**. Access to rehabilitate the sewer laterals will be made through the existing manholes and/or cleanouts. Other related work entails lateral cleanout installations and external spot repairs to laterals as needed.

Odor generation might result from a material called resin used to solidify the lining that is installed along the walls of the existing sewer mains. There is **no danger to residents and homes near the project area**. You will see construction crew members wearing personal protective gear, as required by the Occupational Safety and Health Organization (OSHA), to enter the manholes safely and prevent the inhaling of tiny filters resulting from construction activity inside the manholes. Residents near the construction area should not be concerned about exposure to these elements, as they are nowhere near the sewer pipe.

The project also requires the Contractor to develop, obtain City approval for, and implement traffic control during construction to protect everyone's safety within the project areas. The Contractor will also be directed to keep the area as clean as possible from dirt and dust at all times.

Project Schedule

Completion of Project Design: Spring 2015*

Construction: Winter 2016 to Fall 2016*

*All dates are approximate and subject to change.

Project Budget

The estimated cost of the project is \$8,000,000.

Month 2012
